Call for Speakers
"Make AutomationML yours!"

In the past the improvement of efficiency and quality of production system's engineering processes has been addressed by improving domain specific engineering tools. In recent years the focus has changed to the improvement of the interactions within engineering networks. Accordingly, time and cost savings as well as risk reductions can especially be achieved by implementing more effective tool chains within a company as well as across companies. Since more than 10 years AutomationML is under development to assist this increase in efficiency by providing a progressive data exchange format.

The 5th AutomationML user conference shows the present and the future of AutomationML. Therefore, the following key subjects will be addressed without excluding other subjects:

- Success stories: Application of AutomationML in the engineering process of production systems
- Guidelines: Implementation of AutomationML based workflows across domains and organizations
- Visions: Future applications and possible enhancements of AutomationML

Experiences from industrial practice and current research efforts will be presented.

You are cordially invited to present your topic at the conference which is expected to attract international representatives from industry, research, and academia.

We are looking forward to welcoming you at the ABB Business Center in Gothenburg, Sweden, for the 5th AutomationML User Conference.

Important dates:

Abstract submission (max. 1 DIN A4 page):	April 30th, 2018
Notification of acceptance/rejection:	May 16th, 2018
Submission of slides (and papers)[1]:	September 12th, 2018

If you are interested in describing your topic in more detail, you can submit a paper besides your slides. In this case, the paper will be included in the conference proceedings. Conference proceedings will be published on AutomationML's web page, subsequent to the conference.

Submission of slides and papers: Working language of the conference is English. The authors of the accepted topics commit themselves to present their topic in form of a presentation. The presentation time for research efforts is limited to 20 minutes, for practical experiences in industry to 30 minutes.

Regarding the paper, there is no page limit and no special template to be used. But the speakers are requested to meet the IEEE formatting guidelines.

Slides and papers have to be submitted to office@automationml.org.

Conference structure[2]: Besides many presentations and time for asking questions, day 1 ends with a dinner with all participants. On day 2 the presentations will be continued.

Participation fee: 449 € (both days), 299 € (one day); plus 19 % VAT. The participation is free of charge for all speakers and for two people per AutomationML e.V. member (speakers will be included).

Further information: Contact the AutomationML e.V. Office office@automationml.org or visit our webpage www.automationml.org/o.red.c/conference2018 (coming soon).

---

[1] Please note that the deadline for submission of slides and papers is binding. Slides and papers that are not submitted until September 12th, 2018, will not be published within the conference proceedings. Papers and slides will also not be published, if references to companies, products or trademarks account for more than 10% of the volume.
[2] The conference structure might be subject of change.
